DESIGN RELATIONS TO IDEAS IN CLASS

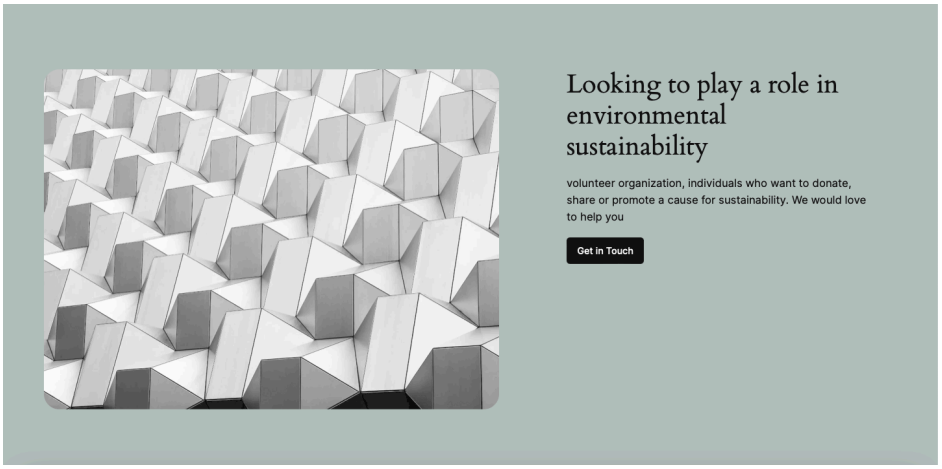

1. SIGNIFIER: the big buttons that have clear instructions on what users can instinctively interact with and where to find what they are looking for (DONATE NOW, BOOK APPOINTMENT)

Currently, the appointment booking is the only one on Wordpress following our design on the right, with others following soon.

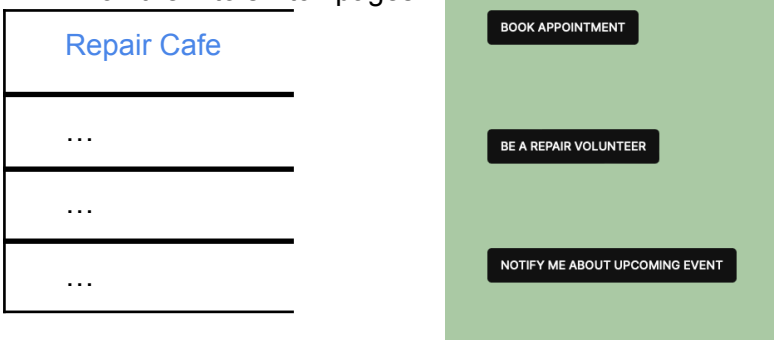

2. Sections are ENCLOSED to fit the specific aesthetic chosen, both through pictures and text on each page.

Our vision still follows the prototype, but is falling drastically behind. Thus, we are following the prototypes as we design and experiment

3. FEEDBACK is shown through colours as users hover over interactive texts and press on them to switch pages.

Note* Only the buttons have been used on Wordpress, and dropdown menus (like on the left) will follow.
